Comparing DUALPI2-RC (IETF draft parameters) with any_ect option set with PIE and FQ-CODEL.

Full description of parameters:

pie: target 15.0ms tupdate 16.0ms alpha 2 beta 20 ec
n ecndrop 0

dualpi2rc: limit 40000p target 15.0ms tupdate 16.0ms alpha 0.156250 beta 3.195312 any_ect coupling_factor 2 drop_on_overload step_thresh 1.0ms drop_dequeue classic_protection 10%

fqcodel: ecn ce_threshold 1ms

Appendix A

Equal RTT experiments

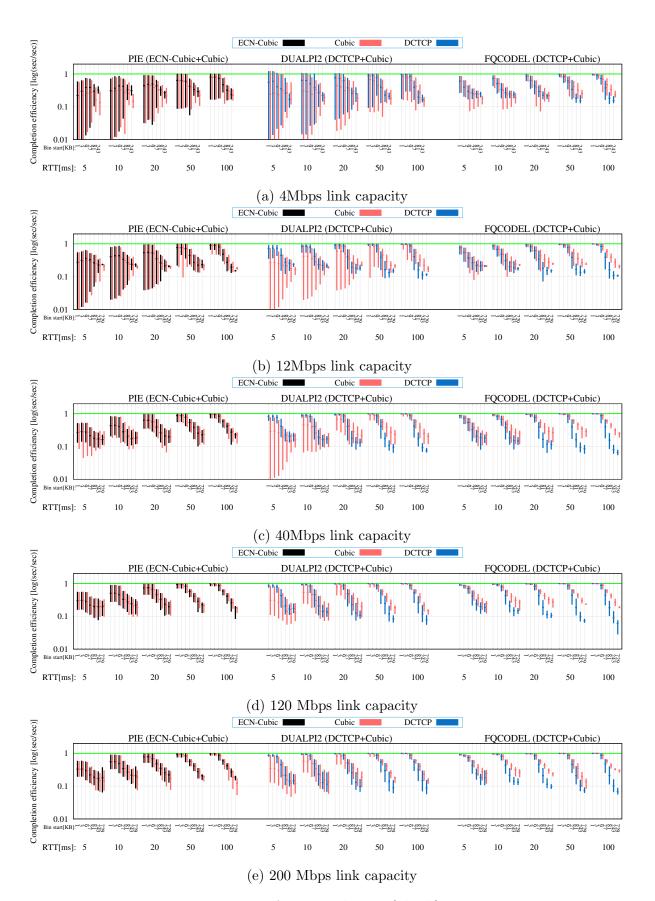

Figure A.1: Equal RTT (1h-1h)

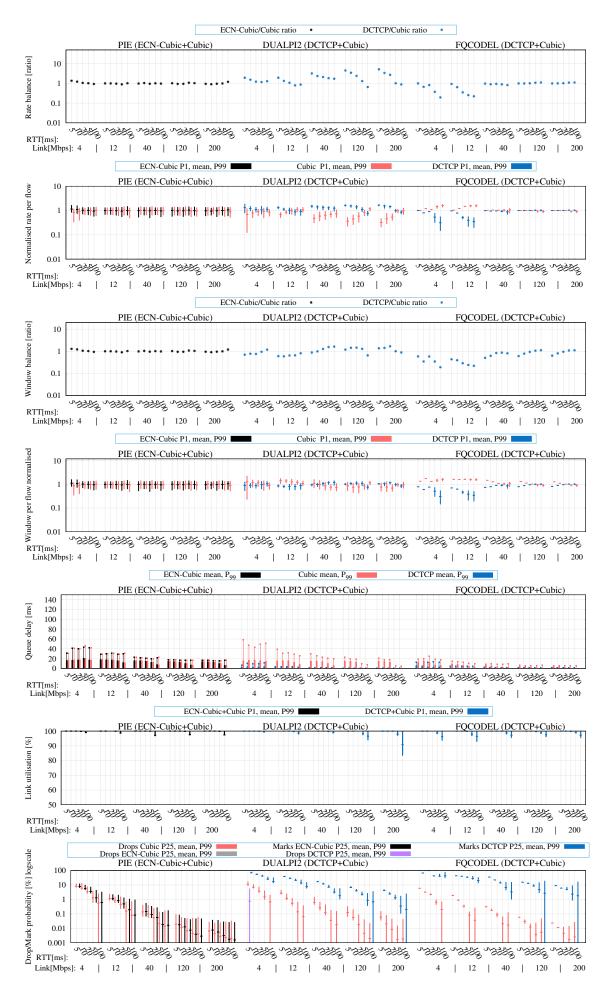

Figure A.2: Equal RTT (1-1)

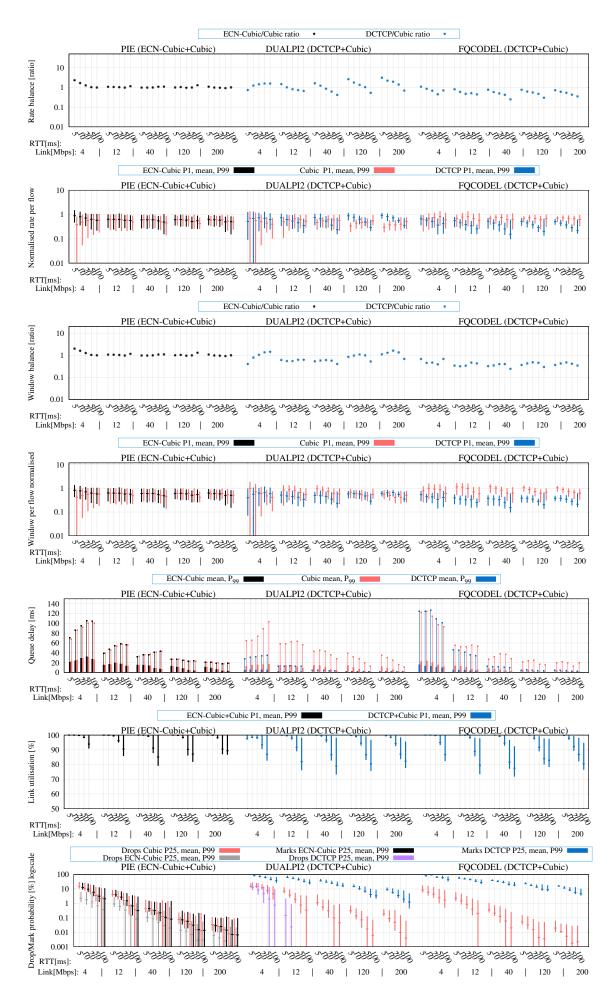

Figure A.3: Equal RTT (1h-1h)

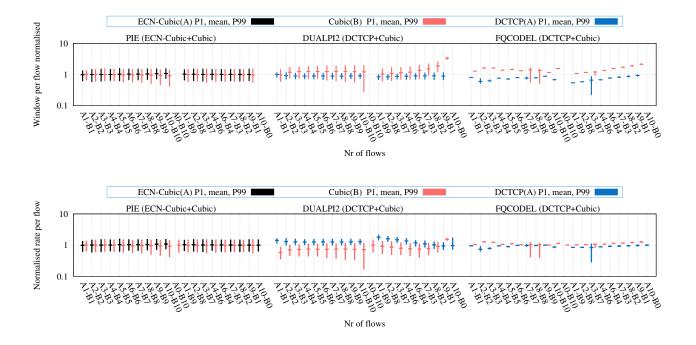

Figure A.4: Normalised rate and window size per flow. 40Mbps link capacity, 10 ms RTT. Equal RTT

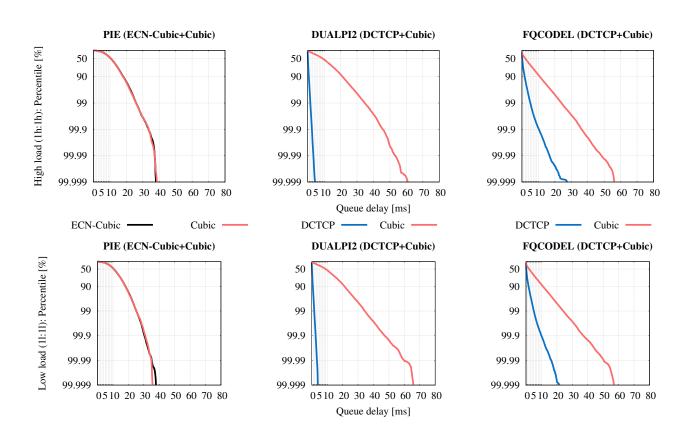

Figure A.5: Queue delay CCDF. 120Mbps link capacity, 10ms RTT. Equal RTT

Appendix B

Mixed RTT experiments

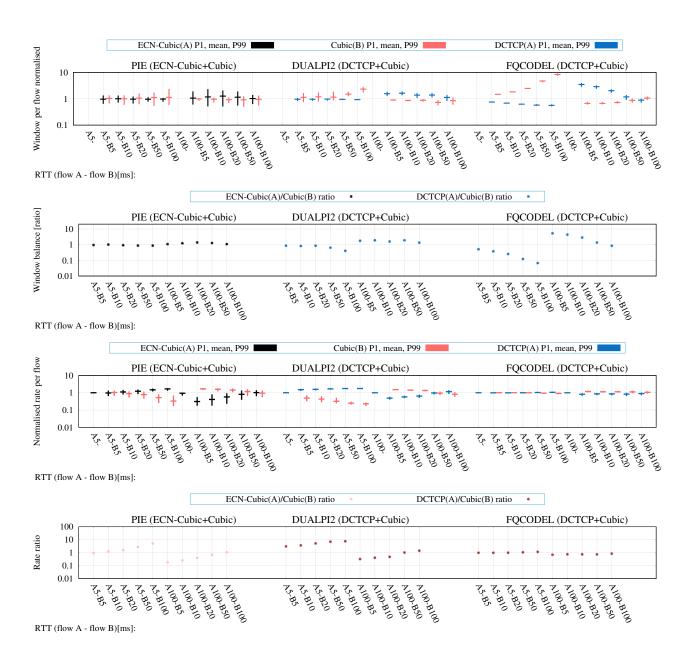

Figure B.1: 1 flow for each CC. Mixed RTT (mrtt2'link40)

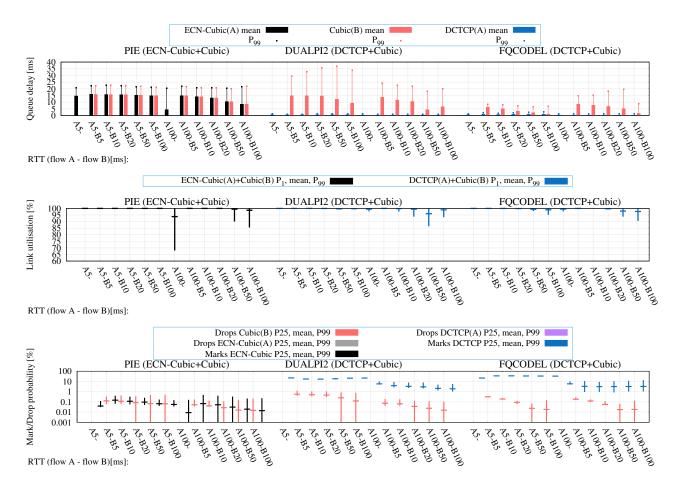

Figure B.2: 1 flow for each CC. Mixed RTT (mrtt2'link40)

Appendix C

Overload experiments

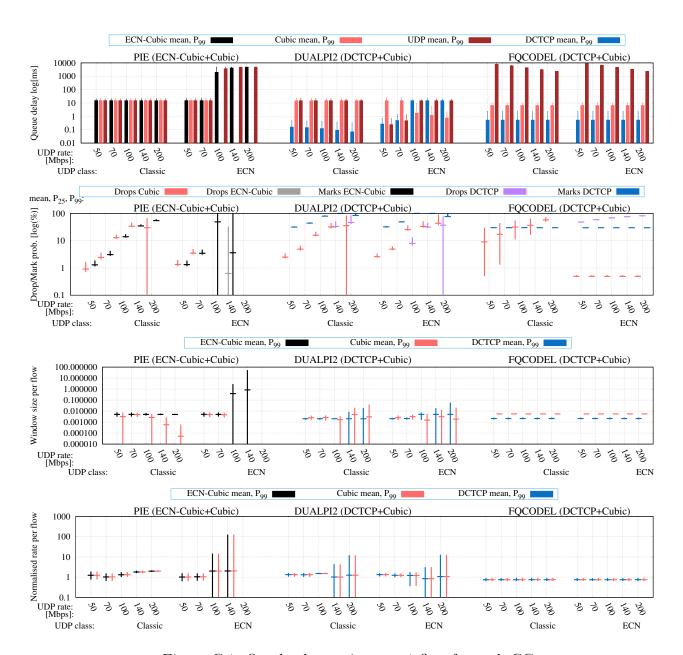

Figure C.1: Overload experiments. 1 flow for each CC
